---

(1) Login with facebook option allows for quicker login.

(2) Email and Password fields if the user already has an account and prefers email login.

(3) Forgot Password option for users that made an account but do not remember their password. Will direct them to a new page with an option to send a new password to the email of their choice.

(4) (5) Login or Create Account buttons lead the user to their next step in order to login.

(6) (7) Confirmation of email and password to make sure the entered the information correctly to avoid future error.

(8) Sign up button to create account. (All buttons have drop shadows and a thin stroke to show usability)

(9) Drop down option to show all States.

(10) Drop down option to show a billing info form if not the same information as shipping info.

(11) check box to confirm billing info matches shipping and that no drop down form is needed. (Saves user time, they don't have to enter the same info twice.)

(12) (13) Next and back button to help user move forward to the next step or back if they made a mistake.

(14) Progress bar to show how much of the checkout flow the user has completed/has left.
